

Two packs. A clearer comparison.

Copy what each label says. Leave unknowns blank and note a question.
This sheet identifies information to check. It does not choose a winner.

Start with the role

Complete: formulated to meet needs when fed as directed for the stated animal/life stage.
Complementary: used with other food or as a treat, as directed. Not a sole diet.

Example: A says complete adult cat food; B says complementary adult cat food.

Write from the pack	Food A	Food B

One question to ask the manufacturer or veterinary team

An ingredient list alone does not settle nutritional quality or individual suitability.
For ingredient explanations in the app: [nutripet.app](#). New scans require Pro.
